

Uninstalling Aarhus Workbench

Follow the six steps below to uninstall Aarhus Workbench on Win XP and Win 2000 computers. It is important to uninstall all four components before installing the Aarhus Workbench version 3.

1. Go to *Add or Remove Programs* (*Start menu\Settings\Control Panel*) and chose *Change or Remove Programs*.
2. Find and remove the **Firebird** program. Go through the process of uninstalling the program (remove shared files)
3. Find and remove the **MapInfo MapX 4.0 OCX** program. Go through the process of uninstalling the program (remove shared files)
4. Find and remove the **Sentinel System Driver** if it exists
5. Find and remove the **Workbench** Program
6. Reboot the system

You are now ready to install Aarhus Workbench version 3.

See the document “Installing Aarhus Workbench version 3“ for help to installation of the new version of Aarhus Workbench.
