Application for student license, Aarhus Workbench

SkyWare wish to support the science and by giving cost-price licenses for our software programs we hope to assist young scientists to a better workflow with their data. The license itself is free, only the expenses for integrated 3rd party software must be covered. For the Aarhus Workbench there is a price of approximately 200 euros covering MapX which is a MapInfo GIS-component. The SiTEM/Semdi package is free.

Please fill out this form and return it to SkyWare to obtain a license for the Aarhus Workbench and/or SiTEM/Semdi. Email and postal address are found on skyware.dk.

The license is personal for a single user and must be used exclusively for non-commercial, scientific purposes in connection to ongoing studies at a recognized university. When the studies are finished the license terminates and all copies of the program must be destroyed.

We hope that you will find our programs useful in your research.

1. Name:

2. e-mail address:

3. University:

4. Address:

5. Level (BSc, MSc, PhD):

6. Project description:

Please attach a description (2 pages max) of the project for which you will use the Aarhus Workbench and/or SiTEM/Semdi.

7. Signatures:

Date:

Student
